## SUMMARY

As a developer, my objective is to leverage my technical skills and passion for coding to contribute effectively to a dynamic and innovative organization. By staying updated with emerging technologies and trends, I strive to continuously improve my skills and make valuable contributions that drive the success of the organization while fostering personal growth and professional advancement.

## PROJECTS

### Weather Forecast Application

(May 23- Present)

- Developed and created a Weather Forecast App which delivers real-time meteorological insights effortlessly. Seamlessly retrieve and display accurate weather data through APIs, ensuring up-to-date information for users. Intuitively designed, the app offers user-friendly interfaces for location-based forecasts, temperature trends, and precipitation probabilities. Leverage device features for enhanced user experience, including geolocation for local forecasts. With sleek visuals and smooth navigation, this app provides users with timely weather updates, empowering them to plan their days effectively.

### Music Application

(Oct 21- Present)

- Developed a music streaming application with the use of Java and XML to create an intuitive user interface. Debugged code using Android Studio and tested with a variety of test cases. This application helps user to listen the songs and user can also create their own playlist to listen their favourite songs online. Implemented new features in the application, which increase user engagement by 15%. Improved the application's performance and UI/UX by employing efficient algorithms.

### Travel Agency Website

(Jan 22-May 22)

- Crafted an Travel Agency Website and designed cutting-edge web development tools, the platform offers seamless navigation and a visually captivating experience. Discover an array of travel destinations, exquisite accommodations, and exciting itineraries showcased through stunning images and engaging content. User-friendly features facilitate easy trip bookings, with responsive design, our website adapts flawlessly to various devices, enhancing accessibility.

## EDUCATION QUALIFICATIONS

Master of Computer Applications | Jain University - Bangalore

CGPA : 7.32 (Oct 21- Present)

Bachelor of Computer Applications | Veer Narmad South Gujarat University - Surat

CGPA : 7.20 (Aug 18- July 21)

## CERTIFICATIONS

### Personality Prediction System Using Machine Learning | Jain University - Bangalore

(Mar 23)

Certified in presenting and researching on "Personality Prediction System using Machine Learning" which is based on the concept of Graphology.
