JAINAM KARANIA

Frontend Developer | Software Developer

Ankleshwar, India | +91-9104955662 | jainamkarania05@gmail.com | Portfolio | LinkedIn | GitHub

SKILLS

- **Programming Languages:** Python, Java, JavaScript/TypeScript
- **Web & Backend Development:** React, Node.js, FastAPI, REST API design, OOP principles
- **Testing & Quality:** Jest, unit testing, debugging, adherence to coding standards and best practices
- **ML & Data Libraries:** NumPy, Pandas, scikit-learn, PyTorch/TensorFlow
- **Generative AI & NLP:** LLM integration, prompt engineering, RAG pipelines, LangChain
- **Databases:** PostgreSQL, MySQL, relational schema design
- **Productivity & Collaboration Tools:** Google Workspace (Docs, Sheets, Slides, Drive), Git
- **Cloud & Tools:** Google Cloud Platform, AWS/Azure, VS Code, Jupyter Notebook

EXPERIENCE

Frontend Engineer | Pure Connect Technologies, Ankleshwar *Aug 2024 – Feb 2025*

- Learned and applied frontend development fundamentals, building features in React with TypeScript and JavaScript while following team coding standards and conventions.
- Worked closely with teammates to understand requirements, implement UI components, and iterate based on feedback in a fast-paced, collaborative environment.
- Debugged and tested components to ensure functionality and quality before integration, building comfort with day-to-day QA practices.
- Explored and integrated AI-assisted features into application workflows, reflecting a self-driven interest in new technologies.

Webflow Developer | theCSSagency, Surat *Oct 2023 – Feb 2024*

- Took ownership of translating Figma designs into production-ready, responsive builds, learning new tools and platforms independently.
- Collaborated with designers and stakeholders to troubleshoot issues, incorporate feedback, and deliver consistent, high-quality results.
- Followed structured naming and architecture conventions (Client-First) to keep projects organized, maintainable, and easy for others to pick up.

PROJECTS

Voice Ai Agent (Speech-to-text Chatbot) *May 2026 – Present*

- Designed and built a backend REST API layer with Axios-based client integration to expose core functionality, debugging latency issues to cut response time by 25%.
- Applied iterative testing and evaluation to validate real-time audio processing and inference logic, reaching 80% interaction accuracy across English and Hindi conversations.
- Tuned retry and error-handling logic against third-party API constraints, improving uptime and request success rate by 35%.
- Built and tested a React/Tailwind CSS frontend to surface outputs to end users, increasing retention by 40%.

Task Manager (Schedular) AI Agent *Apr 2026 – Present*

- Developed and unit-tested backend REST APIs with Python and FastAPI, applying OOP and modular design principles for long-term maintainability.
- Designed a PostgreSQL schema for data storage and retrieval, reducing query latency by 25%.
- Debugged and iteratively refined a retrieval pipeline built on Ollama's Mistral model, improving response accuracy to 70% and query relevance by 40%.
- Wrote modular, testable Python code across the backend pipeline, following clean-code practices.

G-Force (ChatBot) *Dec 2025 – Apr 2026*

- Built and tested a high-performance UI (React.js, TypeScript, Tailwind CSS, GSAP) that drove a 40% rise in platform traffic and a 25% increase in conversions.
- Implemented and debugged a data-processing pipeline (text chunking, embeddings, retrieval) to reduce hallucinations and improve response accuracy.
- Evaluated and iterated on retrieval workflows using a measure-and-refine approach, guided by answer-relevance testing.

EDUCATION

- **MCA | Jain University, Bangalore** — CGPA: 7.43 (Sep 2021 – May 2023)
- **BCA | Shri Manilal Kadakia College, Ankleshwar** — CGPA: 7.20 (Aug 2018 – May 2021)

CERTIFICATIONS

GenAI Exchange Program powered by Google Cloud & Hack2Skill | Google – Virtual

- Ranked 14th out of 200,000+ candidates, completed 5 GenAI courses via Google Skills Boost and Hack2Skill.

Forward Program | McKinsey & Company — Virtual

- Completed McKinsey & Company's Forward Program (July 2025), focused on problem-solving frameworks, critical thinking, and professional skill-building.
